7		 A close-up photograph showing a microcontroller board (likely an Arduino Pro Mini) being soldered into a custom-built boat hull. The board is mounted on a blue PCB and is being held in place by a pair of tweezers. The hull is made of a light-colored material, possibly wood or plastic, and is filled with a white foam-like insulation. A black wire is connected to the board.	
8	/	 A photograph of a completed white boat hull, likely made of wood or plastic, resting on a wooden table. The hull is open at the top, revealing the internal components, including a microcontroller board and various wires. The hull is mounted on a small wooden base. A ruler is visible on the table next to the boat.	« ».
